IN THE CLAIMS

Please amend the claims as follows:

- 1. (original) A metal halide lamp comprising a substantially cylindrical discharge vessel (3) having an internal diameter Di < 2.0 mm and filled with an ionizable filling, wherein two electrodes are present at a mutual distance EA for maintaining a discharge in the discharge vessel, wherein the filling comprises an inert gas such as Xe having a pressure at room temperature between 5 and 25 bar, and an ionizable salt, characterized in that said ionizable salt is selected from the group comprising PrI₃, NdI₃ and LuI₃.
- 2. (original) A lamp according to claim 1, wherein said ionizable salt further comprises NaI, and wherein the molar ratio $NaI/(PrI_3 + NdI_3 + LuI_3)$ lies between 1.0 and 10.3.
- 3. (original) A lamp according to claim 2, wherein the molar ratio NaI/PrI_3 lies between 2.3 and 10.3, preferably between 3.0 and 5.7, and more preferably is approximately 3.5.
- 4. (currently amended) A lamp according to any of the preceding elaims 1-3claim 1, wherein the amount of PrI₃ in the discharge

vessel is between 10 and 335 μ mol/cm³, preferably between 25 and 160 μ mol/cm³, more preferably approximately 50 μ mol/cm³.

- 5. (original) A lamp according to claim 2, wherein the molar ratio NaI/NdI_3 lies between 3.0 and 6.7, preferably between 3.6 and 4.8, and more preferably is approximately 4.2.
- 6. (currently amended) A lamp according to any of the preceding claims 1 -5claim 1, wherein the amount of NdI₃ in the discharge vessel is between 8 and 301 μ mol/cm³, preferably between 30 and 167 μ mol/cm³, more preferably approximately 45 μ mol/cm³.
- 7. (original) A lamp according to claim 2, wherein the molar ratio NaI/LuI_3 lies between 1.0 and 3.2, preferably between 1.2 and 1.8, and more preferably is approximately 1.4.
- 8. (currently amended) A lamp according to any of the preceding claims 1—7claim 1, wherein the amount of LuI₃ in the discharge vessel is between 15 and 414 μ mol/cm³, preferably between 27 and 230 μ mol/cm³, more preferably approximately 69 μ mol/cm³.
- 9. (currently amended) A lamp according to any of the preceding claims 1 9 claim 1, wherein Di < 1.5 mm.

- 10. (currently amended) A lamp according to any of the preceding elaims 1 10claim 1, wherein EA lies between 3 mm and 7 mm.
- 11. (currently amended) A lamp according to any of the preceding claims 1 11claim 1, wherein the discharge vessel has a ceramic wall.
- 12. (currently amended) A lamp according to any of the preceding claims 1 12claim 1, wherein the discharge vessel is surrounded by a gas-filled outer bulb.
- 13. (currently amended) A lamp according to any of the preceding claims 1 13claim 1, wherein the lamp power lies between 20 W and 40 W.
